

EnhancedClean Pathogen Control for Occupant and Building Wellness

A holistic approach to creating healthier buildings

There is a heightened sense of scrutiny for demonstrating that you are doing your part to provide clean, healthy, and safe environments. As your facilities return to normal occupancy levels, providing peace of mind is vital. ABM is uniquely positioned to help our clients prevent the spread of pathogens through a three-tiered approach to building disinfection.

Beyond maintaining cleanliness, ABM's EnhancedClean program can help you assure occupants that you're doing your part to create healthier spaces – whether it's upon reopening comprehensively, disinfecting more frequently, or responding to emergent situations.

Determining the Right Approach at the Right Time

Every building is unique, but what all facilities have in common is the ongoing need for preventative practices and regular disinfection to improve the health and wellness of the building and its occupants.

We can help you meet the evolving challenges of reopening and ongoing facility services, supplemented by broad disinfection technologies to cover every angle of building wellness.

	Suggested Service Frequency	Methods Employed	Team Members Deployed	Potential Supplies and Equipment	Other Features and Benefits
Facilities Reopening Services	Pre-opening site assessment(s). One-time deep clean, or in intervals of reopenings.	<ul style="list-style-type: none"> Plan return to work strategy Follow reopening checklist Implement preventative products strategy Workforce protocols (i.e. PPE & social distancing procedures) 	Trained and certified disinfection specialists.	<ul style="list-style-type: none"> EPA-registered disinfectants Touchless automated restroom equipment No touch fixtures, dispensers, doors openers Hand-sanitizing stations Centralized trash receptacles Sensor technologies 	Comprehensive site assessment to reduce transmission potential.
Enhanced Scope Services	Intervals range from hourly to daily to curb community spread of pathogens.	<ul style="list-style-type: none"> Site-specific SOW for each facility type per occupancy levels and traffic patterns Disinfection of all high touch point areas in facility Indoor air quality strategy 	Trained and certified disinfection specialists.	All of the above, plus: <ul style="list-style-type: none"> Electrostatic sprayers Fogging systems Antimicrobial technologies and coatings 	Improved frequency, visibility, and efficacy of cleaning program through increased staff and scope. Other services such as Engineering, HVAC and Parking offer opportunities for enhanced pathogen prevention as well.
Deep Disinfection Services	Intervals range from monthly to quarterly to provide more thorough and broader surface coverage.	<ul style="list-style-type: none"> Site(s) audit and validation of steps to be taken Specialized SOW for the facility type Elevated protection practices 	Specialized teams certified in assessing and responding to bio-risk hazards.	<ul style="list-style-type: none"> UV technologies Contamination awareness technology Indoor air quality testing devices Window and light coatings 	Expert designed program with certification.

Enhanced Cleaning for Tenant Environments

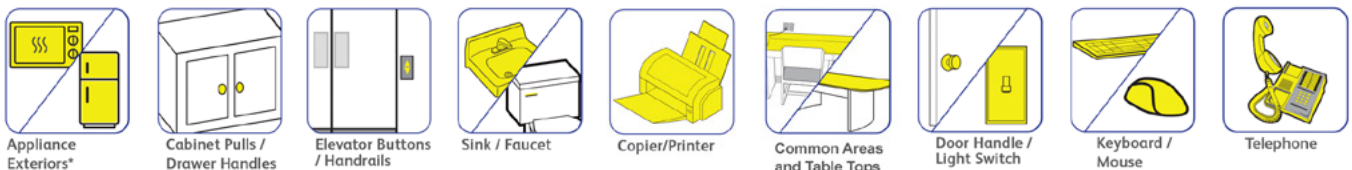

There are levels of cleaning you can consider beyond basic cleaning methods for implementing health and wellness practices in your office. Any option follows OSHA and CDC guidance, with enhanced levels addressing building reopenings and ongoing disinfecting.

Service Levels Available

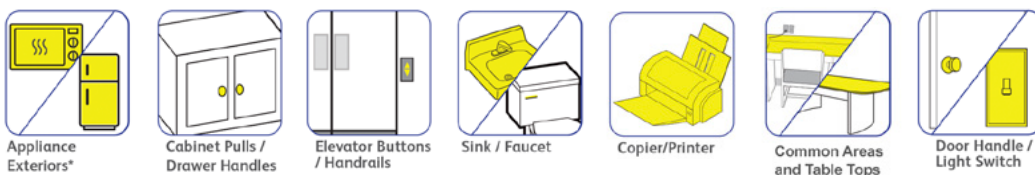

1. One time full cleaning and enhanced disinfection of private space with a focus on high touch points.

2. Daily or reoccurring enhanced disinfection of private space with a focus on high touch points.

3. Daily tenant common area enhanced disinfection of private space with a focus on high touch points.

*ABM utilizes EPA registered disinfectants for SAR-CoV-2. Prior to commencement of work, ABM requires a contract and work order to be signed. These cleaning methods can help reduce transmission but cannot guarantee pathogen eradication.
